Subject: Re: ECO 1154

Christina and Charlie,

The proposed modification to the ES&S EVS 6300 system in ECO-1154 is designed to make structural improvements to the DS300 ballot box design to improve the overall usability and manufacture of those ballot boxes.

I agree with Tom that the proposed changes are de minimis and do not adversely impact the security or the performance of the system. Because this modification improves the overall structure of those ballot boxes, I recommend approval of this modification to the EVS 6300 system.

Thanks,

Chuck Pinney

Charlton,

I have reviewed the material and I agree with the VSTL that ECO-1154 is de minimis. The ECO will not cause any change in the security or operation of the election systems utilizing this ballot box.
