Christina and Charlie,

The modification to EVS 6300 contained in ECO-1174 involves the addition of a motor cradle bracket to the door used for the thermal report printer on the DS300 precinct scanner. The purpose of the bracket is to prevent a possible deformation of the thermal report printer.

I agree with Brian that the proposed changes are de minimis and do not adversely impact the performance or security of the system. I recommend approval of ECO-1174.

Thanks,

Chuck Pinney

Hi Charlie,

I approve of ECO-1174. The changes are de minimis and do not negatively affect the voting system's suitability for use in Texas.

Thanks,
Brian
