

Figure 2: GAME NO. 2672 - 4.0

| <b>Prize Amount</b> | <b>Approximate Number of Winners*</b> | <b>Approximate Odds are 1 in **</b> |
|---------------------|---------------------------------------|-------------------------------------|
| \$2.00              | 948,480                               | 9.62                                |
| \$4.00              | 729,600                               | 12.50                               |
| \$5.00              | 145,920                               | 62.50                               |
| \$10.00             | 109,440                               | 83.33                               |
| \$20.00             | 72,960                                | 125.00                              |
| \$50.00             | 60,800                                | 150.00                              |
| \$100               | 4,940                                 | 1,846.15                            |
| \$1,000             | 76                                    | 120,000.00                          |
| \$30,000            | 5                                     | 1,824,000.00                        |

\*The number of prizes in a game is approximate based on the number of tickets ordered. The number of actual prizes available in a game may vary based on number of tickets manufactured, testing, distribution, sales and number of prizes claimed.

\*\*The overall odds of winning a prize are 1 in 4.40. The individual odds of winning for a particular prize level may vary based on sales, distribution, testing, and number of prizes claimed.
