#### Notice of Issuance of New Air Quality Standard Permit for Natural Gas Electric Generating Units

The Texas Commission on Environmental Quality (TCEQ or commission) issues a new non-rule air quality standard permit for natural gas fired electric generating units (EGUs) in accordance with 30 Texas Administrative Code (TAC) §116.605, Standard Permit Amendment and

Revocation. The new standard permit provides a preconstruction authorization that may be used by any natural gas fired EGU complying with the standard permit requirements provided the natural gas (NG) EGU is not prohibited by other local, state, or federal permitting statutes or regulations. It provides applicants with greater operational flexibility than allowed under Permit by Rule (PBR) when seeking authorization of NG EGUs at a site and serves as an alternative option to the existing Air Quality Standard Permit for Electric Generating Units. The new standard permit is only applicable to spark-ignited internal combustion engines firing natural gas and excludes boilers and turbines. It includes operating specifications and emission limitations for typical natural gas engines during routine operation and planned maintenance, startup, and shutdown (MSS). The new standard permit is effective on January 30, 2025.

Copies of the standard permit and summary can be obtained from the commission's website at:

<https://www.tceq.texas.gov/permitting/air/nav/standard.html>. For further information, please contact Stephanie Heath, Air Permits Division, at [stephanie.heath@tceq.texas.gov](mailto:stephanie.heath@tceq.texas.gov).

#### Explanation and Background of New Air Quality Standard Permit

The New Source Review Program under Chapter 116 requires any person who plans to construct any new facility or to engage in the modifications of any existing facility which may emit air contaminants into the air of the state to obtain a permit pursuant to §116.110, Applicability, or satisfy the conditions of a standard permit, a flexible permit, or a permit by rule, before any actual work is begun on the facility. A standard permit authorizes the construction or modification of new or existing facilities which are similar in terms of operations, processes, and emissions.

The standard permit provides a preconstruction authorization that may be used for any natural gas fired EGU complying with the standard permit requirements and does not relieve the owner or operator from any other applicable provisions of the Texas Health and Safety Code (THSC), Texas Water Code, rules of the TCEQ, or any additional state or federal regulations. The standard permit can be used to reauthorize existing engines authorized under PBR or the existing EGU standard permit, provided that the entire engine is reauthorized under the NG EGU standard permit. The standard permit cannot be used to modify existing engines authorized under 30 TAC Chapter 116 Subchapter B, Subchapter C, or Subchapter G.

#### Overview of New Air Quality Standard Permit

The commission issues the new air quality standard permit for natural gas fired EGUs under the authority of the Texas Clean Air Act (TCAA), THSC, §382.05195, Standard Permit, and 30 TAC Chapter 116, Subchapter F, Standard Permits.

The standard permit analysis is required by statute to include Best Available Control Technology (BACT) for each source. BACT is an emission limitation or control technique that results in the maximum degree of pollution reduction while maintaining technical and economic feasibility. The BACT requirements included in the new standard permit are based on existing Tier I BACT requirements as well as review of numerous existing natural gas fired EGUs. The BACT requirements are considered commonly used for these sources and operation types.

#### Public Notice and Comment Period

In accordance with 30 TAC §116.603, Public Participation in Issuance of Standard Permits, TCEQ published notice of the proposed standard permit in the *Texas Register* and newspapers of the largest general circulation in Austin, Houston, and Dallas. Due to a publication error,

Aviso de Solicitud de Comentarios Públicos y Aviso de Reunión Pública Sobre Cinco Borradores de Cargas Diarias Máximas Totales Para Microorganismos Indicadores en las Cuencas Mustang, Persimmon, y New Bayou

The Texas Commission on Environmental Quality (TCEQ) has made available for public comment five draft Total Maximum Daily Loads (TMDLs) for indicator bacteria in the Mustang, Persimmon, and New Bayous watershed, of the Bays and Estuaries Basin in Brazoria and Fort Bend counties. The purpose of the meeting is to provide the public an opportunity to comment on the draft TMDLs in five assessment units: Mustang Bayou 2432A\_01, 2432A\_02, and 2432A\_03; Persimmon Bayou 2432D\_01; and New Bayou 2432E\_01.

A TMDL is a detailed water quality assessment that provides the scientific foundation to allocate pollutant loads in a certain body of water in order to restore and maintain designated uses. The commission requests comments on each of the major components of the TMDL: problem definition, endpoint identification, source analysis, linkage analysis, margin of safety, pollutant load allocation, seasonal variation, public participation, and implementation and reasonable assurance.

After the public comment period, TCEQ may revise the draft TMDLs if appropriate. The final TMDLs will then be considered by the Commission for adoption. Upon adoption, the final TMDLs and a response to all comments received will be made available on TCEQ's website. The TMDLs will then be submitted to the United States Environmental Protection Agency (EPA) Region 6 office for final action. Upon approval by EPA, the TMDLs will be certified as an update to the State of Texas Water Quality Management Plan.

(2) recommendations for the monitoring system required by Texas Water Code §36.1015(e)(4) and (6), including whether the number of monitoring wells are adequate and in appropriate locations and aquifers, in accordance with recommendations established under Texas Water Code §16.060(e)(2)(B);

31 TAC §356.72(a):

(a) When a district has received an annual report required under Texas Water Code §36.1015(e)(6) and reviewed the report for any missing information, the district will submit the report to the agency and request a review, under Texas Water Code §36.1015(j).
